

OFFICIAL WHITEPAPER

August 16, 2022

v2.0

Please note that Whitepaper is considered as a working document. Africa Unite reserves the right to update the Whitepaper from time to time.

INTRODUCTION

Africa Unite BCH is an ecosystem built on SmartBCH, an EVM and Web3 compatible sidechain for Bitcoin Cash, to take advantage of smart contracts, low-cost fast transactions, and decentralization.

Team has issued it's official SEP20 (stands for SmartBCH Expansion Proposal number 20) token called Africa Unite token (MartinB) that was created in April 2022 with a fixed supply and can be found at [0x4ea4a00e15b9e8fee27eb6156a865525083e9f71](https://www.bchexplorer.com/0x4ea4a00e15b9e8fee27eb6156a865525083e9f71). MartinB will be the basis and foundation for raising awareness, connecting businesses and representing all BCH and SmartBCH projects as well as developing MartinB and unite Africa worldwide

PROJECT VISION

MartinB token was not made to be just a token but rather a clarion call. It will be the awakening to the world and to Africans both local and diaspora. Africa Unite BCH aims at preaching unification, human development/use case for other tokens, thus helping Bitcoin Cash towards its mission of becoming a peer to peer payment system.

Our goal is to have a technology that will lead the community towards the adoption of cryptocurrency, to build a global presence that will help in promoting a United Africa and Bitcoin Cash. By using our token such as by holding, tipping, buying and selling, the community basically demonstrates support in Bitcoin Cash development.

MartinB will also provide room for community building and project growth as well in supporting its developers by – aside from sending donations – buying MartinB tokens. It is also part of our vision to give financial assistance and/or invest into other projects in the BCH ecosystem if our funding support allows us.

ECOSYSTEM

1.0 TOKEN

1.1 Token Specification:

Africa Unite token is a token built on SmartBCH sidechain.

Token Name: Africa Unite

Ticker: MartinB

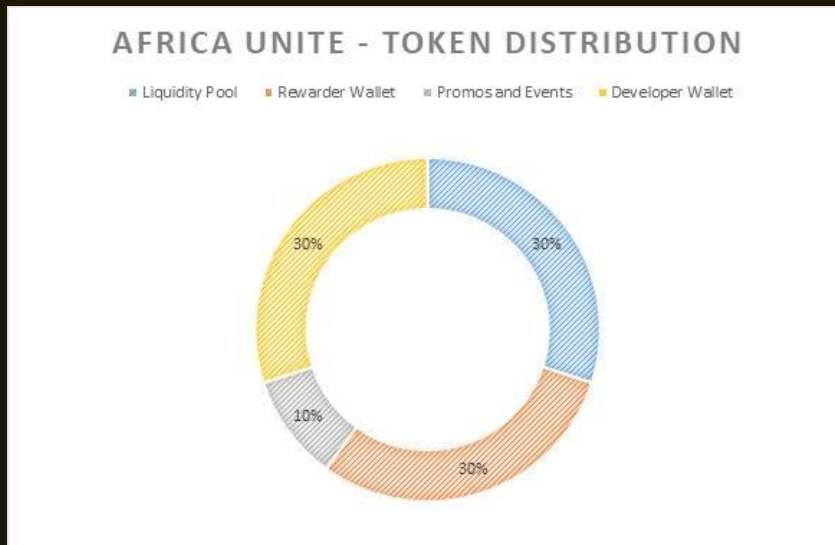

Type: SEP20

Total Fixed Supply: 100, 000, 000, 000, 000

Token Contract: [0x4ea4a00e15b9e8fee27eb6156a865525083e9f71](https://www.bchexplorer.com/0x4ea4a00e15b9e8fee27eb6156a865525083e9f71)

1.2 Token Allocation and Distribution

As outlined in the token distribution, a total of 30% of the supply will be available to purchase directly on **TangoSwap** or **SmartSwap**. Another 30% will be distributed on Tango 2x Farm (MartinB-BCH pair) and in the Tangoswap Token Rewarder address. 10% will be allotted for Incentives, Promotions and Events.

1.3 Token Burn

Team has already burnt 30% of the total token supply from the accumulated tokens on Tango 2x Farm and dev wallet.

Token Burn Transaction:

<https://www.smartscan.cash/transaction/0x85e480d752d36b29e8191f6d1bf87453cdefb3c25a7efd6afaef74aa82955187>

Team plans to burn another 20% from the supply, making MartinB more scarce and more valuable.

1.4 LP 2x Farm

LP Farm lets you earn passive income by locking your tokens into a "pool". It requires you to have special tokens called LP tokens which are the tokens you obtain after you provided liquidity for a certain token pair on a dex, in this case for MartinB/BCH pair on TangoSwap. You, in return, after successfully locking or staking your LP tokens will earn 2 different tokens which are MartinB and Tango.

2.0 NFT COLLECTIONS

2.1 Rush NFT Series

- Jeepney Rush NFT

Collaboration with Jeepney Rush NFTs, a 10,000 pieces jeepney-type collection that resides on SmartBCH Chain with a gift reward use case.

*Raised funds will go to MartinB Liquidity.

Minting Price: 0.1 BCH

Contract Address: 0xb64dc5aa8f34c0db9772f475d4fe2878c1dc5be5

Minting Website (Ongoing): <https://jeepney-rush.onrender.com/>

- Bike Rush NFT

- Bus Rush NFT

2.2 MartinB NFT

A collection of 10,000 unique arts created with specials that will carry hidden quotes or words that can be aligned serially and will result in an unspoken story.

Users will get MartinB token with the same value they invested on minting MartinB NFT. The collector of 5 NFT (the compatible 5 NFT) gets share from 20% of NFT selling value back.

More info soon.

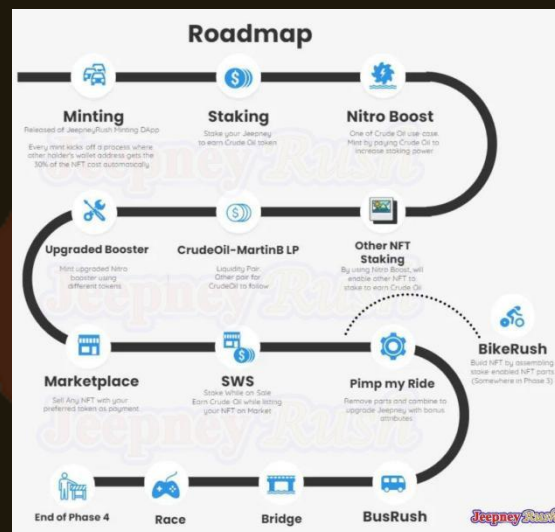

3.0 Staking System

RUSHDAPP

Users will be able to stake Jeepney Rush NFT and other SEP712 tokens, basically every NFTs on SmartBCH. By locking their NFTs into the vault, they earn interest in Crude Oil tokens as a reward.

Crude Oil is the token for RushDApp, its use cases are: Mint Nitro, Liquidity Pair, Listing fee for Marketplace, can be used as payment to whitelist NFT staking, and more will be revealed soon.

ROADMAP:

There are 4 phases in the roadmap.

The 1st phase includes:

- Minting of Jeepney Rush which is currently ongoing
- Staking - already deployed, you can stake any SEP712 NFTs regardless of it being abandoned or is currently active.
 - Initial Earning Rates:
 - *Jeepney Rush - 100 Oil per day
 - *All other NFTs - 25 Oil per day
- Nitro Boost - minted/bought with Crude Oil or other tokens such as MartinB, Knuth, ARG, TANGO. It is used to boost your rewards and enable NFT staking.
 - Different NitroBoosts also have different effects on your staking, your reward multiplier and its duration or validity period depends on the token you used to mint Nitro Boost.
 - Reward rates based on type of Nitro:
 - *Nitro CRUDE for 700 Oil - 2x
 - *Nitro MARTIN for 8, 181, 050, 00 MartinB - 2.1x
 - *Nitro KTH for 58, 821 KTH - 2.2x
 - *Nitro ARG for 112, 126, 000 ARG - 2.2x
 - *Nitro TANGO for 133.77 TANGO - 2.3x

2nd phase includes:

- Other NFT Staking. NitroBoost is required so you can stake and start earning, especially on the rugged NFT projects.
 - Equipping of Nitro can be optional if the project owner requests or demands it.
 - The project owner can pay or be provided with a rewarder address so they can send their own token as an alternative reward aside from Crude Oil. It's called "staking-as-a-service".
 - You don't have to mint Nitro to staked Jeepney Rush and CryptoBug NFTs. If you equip them with Nitro, your reward rate will be boosted.
- CrudeOil-MartinB LP - adding of liquidity on tangoswap.cash
- Upgraded Booster

3rd phase:

- Marketplace for your NFTs where you can sell it for tokens you preferred to get as payment.
- Stake-While-On-Sale (SWS) - a function that allows you to sell or list your NFT up for an auction while still staking and earning rewards on the platform.
- Bike Rush NFT - upcoming fragmented NFT collection where you can assemble them yourself. Every part is stakeable.
 - Fragmentation = splitting of an NFT into parts
- Pimp My Ride - removing and combining of parts to upgrade your Jeepney Rush NFTs with bonus attributes

4th phase:

- Bus Rush
- Bridge
- Racing Game

RushDApp Website Link: <https://rush-dapp.com/>

4.0 DEX

Motherland-Uche DEX

More info soon.

PROMOTION AND MARKETING

NFT AIRDROP EVENT

#1 Twitter Campaign

A total of 100 Jeepney Rush NFTs are reserved and are given out in 10 batches with 10 winners each round.

Directions: https://docs.google.com/forms/d/e/1FAIpQLSdX-nLVCupuYkLNaME5FWkqJB_3_u-NVCiHLJeeSDQ3tRyO_A/viewform

#2 Free Special MartinB NFT for Liquidity Providers

Anyone who will put at least 1 BCH worth of liquidity to MartinB will receive 1 free Special MartinB NFT. There will be only 100 of them and these NFTs are not mintable thus, they are pre-minted but can be staked with high APR.

4.3 ADVERTISEMENT

- Promotional Video
- Articles and Blog Post
- Boosted Social Media Content
- Strategic Partnerships

FOUNDING TEAM

The founding team is a group of BCH enthusiasts and have been long part of the SmartBCH community.

Chibuoke Emmy

- Founder
- TG Username: @Mexzydoo

Chibuoke is a dedicated supporter of Bitcoin Cash and the sidechain. He is a Nigerian and partakes in onboarding people to Bitcoin Cash in Africa. Chibuoke is a self-employed geologist. He's currently a moderator to Knuth Community and is the founder of the project.

Invalid Cast

- Co-Founder and Developer
- TG Username: @InvalidCast

InvalidCast is a Filipino BCH supporter and an NFT creator. He is the co-founder of MartinB and the developer behind the token and RUSH. He has years of experience in accounting, finance, and system developing.

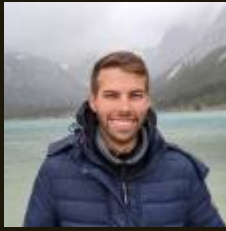

Fernando Pelliccioni

- Chief Sponsor
- TG Username: @fpelliccioni

Fernando is a well-known leader in the Bitcoin Cash Community. He is the founder and developer of TangoSwap DEX on SmartBCH Chain and leads the Knuth Development Team. He also works on the Bitcoin Cash Node project. He is an active supporter of Africa Unite and RushDApp and truly believes in the project's future.

**Ian Blas**

- Advisor
- TG Username: @ianblas27

Ian is also a prominent figure in the Bitcoin Cash Community. He is a co-founder in TangoSwap DEX and developer behind Bitcoin Cash Argentina which focuses on BCH adoption in their country. He also greatly supports the project and is currently the project advisor.

**Sebas TC**

- Admin
- TG Username: @sebastc1

Sebas is also one of the dedicated developers on the sidechain and is the founder behind WenLambo NFTs and token projects. He is a great friend of the project owner and is an admin for Africa Unite.

**Lumang Bulbul**

- Admin
- TG Username: @LumangBulbul

Lumang is a Filipino student and is one of the SmartBCH and BCH supporters. She was once a moderator and a passionate member of the Shilling Team for Poolotto Finance, a project on Binance Smart Chain that's currently inactive now. She is one of the moderators in NFT Club and works as an admin for Africa Unite and RUSH at the moment.

INVESTORS AND PARTNERS

In order to have a breakthrough in the competitive market and become one of the leading projects within the space, Africa Unite will need help from influential investors and partners that will look at Africa Unite as a project and investment with long-term store of value.

ROADMAP

STAGE 1

- ✓ ~~Whitepaper v1.0~~
- ✓ ~~Creation of Africa Unite's Socials~~
- ✓ ~~Listing on Tangoswap.cash~~
- ✓ ~~Token Release~~
- ✓ ~~2x Farming/LP Staking~~
- ✓ ~~Dexscreener Listing~~
- ✓ ~~MartinB Over The Counter Sale with discount~~
- ✓ ~~JeepneyRush NFT Collaboration~~
- ✓ ~~Listing on Marketeap.cash~~

STAGE 2

- MartinB NFT Minting
- ✓ ~~Whitepaper v2.0~~
- ✓ ~~NFT Staking Utility~~
- Token Staking System
- Coinmarketcap Listing
- Coingecko Listing

STAGE 3

- Africa Unite Merchandize
- Development of MartinB USD Stable Token
- Development of MartinB Business Marketplace For Mass Adoption of BCH and SmartBCH tokens.

STAGE 4

- Development of DEX - motherland-uche.com
- Development of MartinB Social Network Platform

(Please take note that Roadmap is not a delivery plan or a release schedule but a document Africa Unite wishes to achieve. Some things might be done in no particular order depending on the circumstances.)
